1. Fix the mounting plugs to the ceiling. Then fix the ceiling plate to ceiling with screws.

2. Place the bulbs.

3. Determine the desired height of the lamp and use either one, two or three of the pipes supplied. Thread the wires through the pipe.

4. Connect the three wires according to their colours. Brown is the live wire, blue is the neutral wire, green/yellow is the earth wire.

5. Slide the canopy over the ceiling plate and fix it with the screws.

6. To get the best effect create a distance of approximately 8 cm between the alabaster and the bulbs. Adjust the height of the steel wires by pressing the wire lock on the ceiling canopy and pulling/pushing the wire through.
